**Description:**
Tracing of map showing the central and western edge of the Hundred of Upper Wakefield. The map is in two parts, the larger part covering land sections on and around the River Wakefield; the other part shows sections on the western side of the Hundred, beside the 'Skylogolee' (Skillogalee) Creek. The township of Watervale is shown laid out on section 146 at top; the settlement of Leasingham is on section 202. (The town of Auburn, though not drawn on this map, is near to section 290 in the centre.) Ink on paper, ink notation. No scale given. Numbered 1) in top right hand corner; at top left is stamp with 'Waterlow & Sons London: Improved'. (Original on same sheet as map 52-53)

The records of the South Australian Company deposited with the State Library of South Australia, Archival collections (BRG 42 or Business Record Group 42) promise to provide historians and researchers with a most useful perspective of the early development of an Australian colonial economy. Besides making a significant contribution to the founding and fashioning of the new settlement of South Australia, The South Australian Company continued to play an important part in the commercial affairs of Adelaide and its surrounding regions for more than a century. As such the volume of material contained in the record group is quite substantial, comprising some fifty major separate series of records occupying in all some nineteen metres of repository shelving. Most of the papers were deposited in the Archival collections in 1937-1938 and came from both the London and Adelaide Offices of the Company. The collection contains some 150 maps of company lands in South Australia.

What is the County of Stanley (South Australia)? The County of Stanley is one of the 49 counties of South Australia. It was proclaimed by Governor George Grey and named for Edward Stanley, Secretary of State for the Colonies from 1841 to 1845, who, in 1842, had advocated financial support for South Australia.[1] It is roughly bounded by the Wakefield River in the south, the approximate path of the Barrier Highway in the east, latitude 33°28' S in the north and longitudes 138°08' to 138°15' E in the west. [1] Hundreds. The county is divided into 16 hundreds. In the county's north west is the Hundred of Koolunga, and, in the north, the Hundred of Yackamoorundie and Hundred of Andrews. The Hundred of Blyth is a cadastral unit of hundred located on the northern Adelaide Plains in South Australia centred on the township of Blyth.[4] It is one of the 16 hundreds of the County of Stanley.[5] It was named in 1860 by Governor Richard MacDonnell after Arthur Blyth who arrived in South Australia as a teenager in 1839 and went on to become a local businessman, parliamentarian and thrice the premier of South Australia.[4] The following localities and towns of the Wakefield Council area are situated inside (or largely inside) the bounds of the Hundred of Blyth: Blyth, Bowillia (most The Hundred of Goyder is the cadastral unit of hundred on the northern Adelaide Plains centred on the locality of Goyder. It is one of the 16 hundreds of the County of Stanley. It was named in 1860 by Governor Richard MacDonnell after Arthur Blyth who arrived in South Australia as a teenager in 1839 and went on to become a local businessman, parliamentarian and thrice the premier of South Australia. The portions of Port Wakefield and Bowmans north of the Wakefield River are also inside the hundred, and small parts of ...
